### Overview

# HP Z2 G9 Tower Workstation Desktop PC

- 1. HDD Activity LED
- 2. Power button
- 3. Universal audio jack (with CTIA & OMTP headset support)
- 4. (2) USB-A 10Gbps ports (1 charge port supports up to 5V/2.1A)
- 5. (2) USB-A 10Gbps rate ports

- 6. (1) USB-C<sup>®</sup> 20Gbps port (optional, charge supports up to 5V/3A)
- 7. SD card reader 4.0 (optional)
- 8. Slim ODD bay
- 9. External 5.25" bay

### **Overview**

- 1. (1) Audio Line-in jack (1) Audio Line-out jack
- 2. (2) DisplayPort 1.4 ports
- Flex I/O module: choose one from the following:
   (1) DisplayPort 1.4, (1) HDMI 2.0b, (1) VGA, (1) Dual USB-A 5Gbps port, (1) USB-C<sup>®</sup> 10Gbps port (Power Delivery 15W, Alt Mode DisplayPort), (1) 2<sup>nd</sup> 1 GbE LAN, (1) Thunderbolt 3
   with USB-C<sup>®</sup> / USB4 40Gbps \* (cabled to PCIe AIC\*\*) (1) 1Gbps Fiber LC NIC
- 4. (2) Hi-Speed USB-A 480Mbps port
- (2) USB-A 10Gbps ports
   (1) USB-A 5Gbps port
   (1) Hi-Speed USB-A 480Mbps port

\*Maximum speed requires DisplayPort<sup>™</sup> and PCIe aggregation. \*\*Thunderbolt support only in PCI-E slot4.

**NOTE:** Onboard Display support DP1.4/HBR2. Flex I/O module Display support DP1.4/HBR3. Resolution all support up to 5120x3200 24bpp @60Hz.

<sup>1</sup> Multicore is designed to improve performance of certain software products. Not all customers or software applications will necessarily benefit from use of this technology. Performance and clock frequency will vary depending on application workload and your hardware and software configurations. Intel's numbering, branding and/or naming is not a measurement of higher performance.

<sup>3</sup> Intel Turbo Boost performance varies depending on hardware, software and overall system configuration. See http://www.intel.com/technology/turboboost for more information.

#### **NOTE 1:** ECC memory is supported

**GENERAL NOTE:** Two channels of DDR5 memory are supported. To realize full performance at least one DIMM must be inserted into each channel.

Though the memory modules can run up to 4800MHz, the current platform will support maximum memory speed of 4400MHz.

The system speed wil Module Configuration	l be determined by a number of key factors: <b>Description of configuration</b>	Max Memory Speed (Actual Memory speed is dependent on CPU)
Single DIMM per channel	Configurations that contain only one or two DIMM modules with DIMMs only in the black slots	4400MHz
Two single ranked DIMMs in a channel	Configurations with 3 or 4 single ranked DIMMs (8GB and 16GB) installed in a system. Memory speed may also vary depending on vendor module mix.	4000MHz
Two dual ranked DIMMs in a channel	Configurations with 3 or 4 dual ranked DIMMs (32GB) installed in a system	3600MHz

When more than one memory slot is populated, symmetric configurations are required for 2 DIMMs per channel. Mix of different part numbers or mix of single and dual ranks within a channel is not allowed.

#### **HP BIOS**

#### Additional HP BIOS Features:

• Power-On password – Helps prevent an unauthorized user from powering on the system.

• Administrator password – Also known as the BIOS Setup password, this helps prevent unauthorized changes to the system configuration. If the administrator password is not known, the BIOS cannot be updated and changes cannot be made to BIOS settings using BIOS Setup or under the OS.

• S4/S5 Maximum Power Savings setting supports EU Lot6 requirement and allows the computer to power down below 0.5W in S4/S5 (when turned off). When S4/S5 Maximum Power Savings feature is enabled below features are turned off:

-Power to expansion connectors / slots

-Most Wake events other than power buttons and WOL(Wake on LAN supported by embedded Lan controller under S4/S5 Maximum Power Saving Enabled ) -USB charging ports

#### HP Sure Start Gen7 Start

• BIOS Integrity checking – Sure Start protection ensures that only trusted BIOS code is executed and not rootkits, viruses and malware. Verification is done upon boot up, shutdown and while the system is on.

• Sure Start is set by default to automatically repair the BIOS if corrupted or compromised but is policy driven for better manageability. Start is set by default to automatically repair the BIOS if corrupted or compromised but is policy driven for better manageability.

• Protecting beyond BIOS – Integrity checking and repair is extended to other data that should be protected such as network configuration parameters, platform specific information (i.e. system IDs), secure boot credentials, and other code the system needs to boot.

• Audit enabled – System Audit via Sure Start Event Logs capture data such as incident, repair date and time for troubleshooting and investigating

**NOTE:** HP Sure Start Gen7 is available on HP Workstation products equipped with Intel<sup>®</sup> 12<sup>th</sup> generation processors.

#### **HP Performance Control Modes**

HP Z Desktop Workstations offers Performance Control Modes in the F10 BIOS menu. Z2 G9 offers Quiet Mode, Performance Mode and High-Performance Mode. HP recommends using High Performance Mode unless you have concerns about acoustics in an open office environment. Customers can get up to 41% performance improvements using High Performance Mode over Performance Mode\*. High Performance Mode is configured as default from the factory.

#### How to Set HP Performance Control Modes in HP F10 BIOS Menu

In the F10 BIOS Menu, the setting titled "Performance Control" is adjustable to High Performance Mode, Performance Mode or Quiet Mode. These modes are choice points for performance and acoustic trade-offs based on user needs or recommended balanced conditions in performance and noise optimization.

At startup, push the F10 key while system is booting to get to the BIOS Menu. Go to  $\rightarrow$  Advanced -> System Options ->scroll down and choose "Performance Control"

Set the Performance Mode you desire and then go back to Main->Save Changes and Exit -> Yes The machine will restart in the mode you've chosen.

#### How to change Performance Modes in HP Performance Advisor software?

Select BIOS Settings -> Advanced -> System Options -> Performance Controls

The machine will restart in the mode you've chosen.

### **Supported Components**

You can change these modes anytime you prefer to prioritize acoustics (Quiet Mode), want a balance between performance and acoustics (Performance Mode) or prefer to prioritize performance (High Performance Mode).

For more information on performance control modes, please see the white paper called, HP Performance Control Modes for Z Desktop Workstations.

\*Compared to Performance Mode. Performance improvement based on Z2 Tower G9 with 64GB of memory, 1TB NVMe, Windows 11 22H2 OS, RTX A4000, i7-14700 CPU using Blender OpenData CPU Render and Arnold 2023 CPU multi-core benchmarking.

# **Physical Security and Serviceability**

Access Panel	Tool-less Includes support information
Optical Drive	Tool-less, except for Screw-In carrier
Hard Drives	Tool-less, except for 2.5" "bay
Expansion Cards	Tool-less
Processor Socket	Tool-less, except for the processor heatsink
Blue User Touch Points	Yes, on tool-less internal chassis mechanisms
Color-coordinated Cables and Connectors	Yes
Memory	Tool-less
System Board	Screw-In
Padlock Support	Yes (optional): Locks side cover and secures chassis from theft 0.22-in diameter padlock loop at rear of system
Cable Lock Support	Yes, Kensington Cable Lock (optional): Locks side cover and secures chassis from theft 3 mm x 7 mm slot at rear of system
Universal Chassis Clamp Lock Support	Yes (optional): Locks side cover and locks cables to chassis. Secures chassis from theft and allows multiple units to be chained together when used with optional cable Threaded feature at rear of system
Solenoid Lock and Hood Sensor	Yes (optional) The Solenoid Hood Lock eliminates the need for a physical key by making the chassis lockable through software and a password. You can also lock and unlock the chassis remotely over the network. The Sensor Kit detects when the access panel has been removed.
Rear Port Control Cover	No
CPUs and Heatsinks	A T-15 Torx or flat blade screwdriver is needed to remove the CPU heatsink before the CPU can be removed. CPU removal is tool-less
Internal Speaker	Yes
Power Supply Fans	70mm x 70mm x 25mm 4-wire PWM (non-serviceable)
Access Panel Key Lock	No
Integrated Chassis Handles	Rear Recessed Handle
Power Supply	Requires T15 Torx or flat blade screwdriver
PCI Card Retention	Yes, rear (all), middle (optional), front (full-length cards with extender)

## Service, Support, and Warranty

On-site Warranty and Service<sup>1</sup>: Three-years, limited warranty and service offering delivers on-site, next business-day<sup>2</sup> service for parts and labor and includes free telephone support<sup>3</sup> 8am – –pm. Global coverage<sup>2</sup> ensures that any product purchased in one country and transferred to another, non-restricted country will remain fully covered under the original warranty and service offering. 24/7 operation will not void the HP warranty. Storage devices are not covered under warranty for 24/7 operation except for Enterprise class HDDs.

#### **NOTE 1:** Terms and conditions may vary by country. Certain restrictions and exclusions apply.

**NOTE 2:** On-site service may be provided pursuant to a service contract between HP and an authorized HP third-party provider, and is not available in certain countries. Global service response times are based on commercially reasonable best effort and may vary by country.

**NOTE 3:** Technical telephone support applies only to HP-configured, HP and HP-qualified, third-party hardware and software. Toll-free calling and 24x7 support service may not be available in some countries.

HP Care Pack Services extend service contracts beyond the standard warranties. Service starts from date of hardware purchase. To choose the right level of service for your HP product, use the HP Care Pack Services Lookup Tool at:

### BIOS

BIOS 64-bit Services PCI 3.0 Support ATAPI BBS WMI Support	BIOS supports 64-bit Operating systems only. Full BIOS support for PCI Express through industry standard interfaces. ATAPI Removable Media Device BIOS Specification Version 1.0. BIOS Boot Specification v1.01.(Not support) WMI is Microsoft's'implementation of Web-Based Enterprise Management (WBEM) for Windows. WMI is fully compliant with the Distributed Management Task Force (DMTF) Common Information Model (CIM) and WBEM specifications.
BIOS Boot Spec 1.01+ BIOS Power On ROM Based Computer Setup Utility (F10) System/Emergency ROM	Provides more control over how and from what devices the workstation will boot.(Not Support) Users can define a specific date and time for the system to power on. Review and customize system configuration settings controlled by the BIOS. Recovers system BIOS in corrupted Flash ROM.
Flash Recovery with Video Replicated Setup SMBIOS Root Control	Saves BIOS settings to USB flash device in human readable file (HpSetup.txt). BiosConfigurationUtility.exe utility can then replicate these settings on machines being deployed without entering Computer Configuration Utility (F10 Setup). System Management BIOS 3.4, for system management information.
Boot Control Memory Change Alert Thermal Alert	Disables the ability to boot from removable media on supported devices. Alerts management console if memory is removed or changed. Monitors the temperature state within the chassis. Three modes: • NORMAL - –ormal temperature ranges. • ALERTED - –xcessive temperatures are detected. Raises a flag so action can be taken to avoid

HP Inc. complies fully with materials regulations. We were among the first companies to extend the restrictions in the European Union (EU) Restriction of Hazardous Substances (RoHS) Directive to our products worldwide through the HP GSE. HP has contributed to the development of related legislation in Europe, as well as China, India, and Vietnam.

We believe the RoHS directive and similar laws play an important role in promoting industry-wide elimination of substances of concern. We have supported the inclusion of additional substancesincluding PVC, BFRs, and certain phthalates—in future RoHS legislation that pertains to electrical and electronics products.

We met our voluntary objective to achieve worldwide compliance with the new EU RoHS requirements for virtually all relevant products by July 2013, and we will continue to extend the scope of the commitment to include further restricted substances as regulations continue to evolve.

To obtain a copy of the HP RoHS Compliance Statement, see HP RoHS position statement.

#### **Material Usage**

This product does not contain any of the following substances in excess of regulatory limits (refer to the HP General Specification for the Environment at

http://www.hp.com/hpinfo/globalcitizenship/environment/supplychain/gen\_specifications.html):

- Asbestos .
- Certain Azo Colorants •
- Certain Brominated Flame Retardants may not be used as flame retardants in plastics
- Cadmium
- **Chlorinated Hydrocarbons**
- **Chlorinated Paraffins**
- Bis(2-Ethvlhexvl) phthalate (DEHP)
- Benzyl butyl phthalate (BBP) •
- Dibutyl phthalate (DBP) •
- Diisobutyl phthalate (DIBP)
- Formaldehyde
- Halogenated Diphenvl Methanes
- Lead carbonates and sulfates
- Lead and Lead compounds •
- Mercuric Oxide Batteries
- Nickel finishes must not be used on the external surface designed to be frequently handled or carried by the user.
- **Ozone Depleting Substances**
- Polybrominated Biphenyls (PBBs) •
- Polybrominated Biphenyl Ethers (PBBEs)
- Polybrominated Biphenyl Oxides (PBBOs) •
- Polychlorinated Biphenyl (PCB)
- Polychlorinated Terphenyls (PCT)
- Polyvinyl Chloride (PVC) except for wires and cables, and certain retail packaging has been voluntarily removed from most applications.
- **Radioactive Substances**
- Tributyl Tin (TBT), Triphenyl Tin (TPT), Tributyl Tin Oxide (TBTO)

# System Technical Specifications

Packaging Usage	<ul> <li>HP follows these guidelines to decrease the environmental impact of product packaging:</li> <li>Eliminate the use of heavy metals such as lead, chromium, mercury and cadmium in packaging materials.</li> <li>Eliminate the use of ozone-depleting substances (ODS) in packaging materials.</li> <li>Design packaging materials for ease of disassembly.</li> <li>Maximize the use of post-consumer recycled content materials in packaging materials.</li> <li>Use readily recyclable packaging materials such as paper and corrugated materials.</li> <li>Reduce size and weight of packages to improve transportation fuel efficiency.</li> <li>Plastic packaging materials are marked according to ISO 11469 and DIN 6120 standards.</li> </ul>
End-of-life Management and Recycling	HP offers end-of-life HP product return and recycling programs in many geographic areas. To recycle your product, please go to: <a href="http://www.hp.com/go/reuse-recycle">http://www.hp.com/go/reuse-recycle</a> or contact your nearest HP sales office. Products returned to HP will be recycled, recovered or disposed of in a responsible manner.
	The EU WEEE directive (2002/95/EC) requires manufacturers to provide treatment information for each product type for use by treatment facilities. This information (product disassembly instructions) is posted on the Hewlett Packard web site at: http://www.hp.com/go/recyclers. These instructions may be used by recyclers and other WEEE treatment facilities as well as HP OEM customers who integrate and re-sell HP equipment.

As such, it ressional application validation, but is intended per AMD to function properly al-time engine, and many prosumer application workloads. Customers using aphic cards are likely to experience higher acoustics in comparison with s. The higher acoustics observed with non-professional graphics is expected, ns do not have control in this area.

Operating Systems Supported	No driver is required for this device. Native support is provided by the operating system.		
	Not all features are available in all editions or versions of Windows. Systems may require upgraded and/or separately purchased hardware, drivers, software or BIOS update to take full advantage of Windows functionality. Windows 10 is automatically updated, which is always enabled. ISP fees may apply and additional requirements may apply over time for updates. See http://www.microsoft.com.		

See http://www.microsoft.com/windows/windows-7/ for details.
